

# Martin Olson

## Summary

I am a developer with a passion for design, coding and software development. I graduated from Coder Academy with a diverse skill set and a strong academic record. Over the last 2 years, I have been applying my skills at NSW Digital and the Department of Customer Service with the CCE and licencing teams.

## Key Projects

### CCE-FT

While working for NSW Digital I have been working on the CCE framework for NSW fair trading, which allows agencies to manage their entire workflow, from the receipt of a complaint to issuing enforcement notices to a business in a single App.

### Seagull!

Seagull is a 3D endless runner/arcade style game I built as a hobby project to learn the unity engine, C#, 3D modelling and animation. Currently can be found on my github account.

### Eshop

This was one of the main projects at \_Nology, A full stack web store application with a React Front end and a Google Firestore Back End

## Tech Skills

### Languages

- SQL
- HTML
- CSS/  
SASS
- Ruby
- Java  
Script
- C#
- PHP
- Java
- Python

### Software

- Unity
- Blender
- Rails
- Github
- NodeJS
- React
- Spring
- NestJS
- Amanda

## Key Skills

- Full stack web development
- 3D modelling and animation
- Web Development
- AI
- JS React
- Agile/Scrum software development

## Employment History

### Junior Amanda Developer - NSW Digital

- As part of the team at CCE I have helped develop the CCE-FT app in the Amanda Platform for NSW fair trading which allows them to conduct their end to end workflow entirely in the AMANDA platform

### Software Development Intern - \_Nology

- Gained experience in web development skills and tech stacks, including Java, Spring, React, NestJS, and NextJS.
- Contributed to the development of \_Nology's learning management system by implementing the Backend CORS policy and Github integration.

### Machine Learning Intern - Ant61

- Assisted in the development of neural networks for robotics to be used in drones and space exploration.

### Intern - World Health Organization Headquarters

- Supported the Secretariat for the International Health Regulations (2005) with preparation work for the International Health Regulations 2014 Review Committee and the Ebola Virus Disease Emergency Committee.

### Industrial Attachment - Kenya Institute of Medical Research

- Conducted laboratory research on tropical diseases, including malaria, HIV, and schistosomiasis, utilizing numerous laboratory techniques.

## Academic History

---

### Coder Academy

Fast track coding boot camp - Complete 2022

### Edith Cowan University

Graduate Diploma of Cybersecurity - Complete 2020

### University of Sydney

Masters of Political Economy - Complete 2018

### Australian National University

Masters of Strategic Studies - Complete 2012

### James Cook University

Bachelor of Science With Honours-  
Complete 2010
